

IndiaKart Business Performance Dashboard

Management Summary Report

Prepared by Rajat Dixit | October 2026

1. Executive Summary

This report summarizes the management-level findings from the IndiaKart Business Performance Dashboard. The dashboard covers revenue and category performance, customer insights, operational performance, and inventory analysis. The purpose is to convert the dashboard visuals into concise observations that management can use for monitoring sales, customers, operations, payments, returns, and stock.

2. Dashboard Coverage

- Revenue Overview
- Category Performance
- Customer Insights
- Operations
- Inventory Analysis

3. Management KPI Snapshot

Area	Dashboard value	Management observation
Customer segments	Regular 4.0K; Budget 2.5K; Premium 1.5K; New 1.5K; Inactive 0.5K	Regular customers form the largest displayed segment.
Order status	Delivered 32.50K; Cancelled 6.00K; Shipped 5.07K; Returned 3.93K; Processing 2.50K	Delivered orders are the dominant status in the Operations view.
Inventory status	In Stock 236,452; Low Stock 1,317; Out of Stock 0	Most displayed inventory is in stock; low-stock items remain a monitoring point.
Warehouse stock	Chennai-WH5 47,400; Delhi-WH2 40,251; Kolkata-WH6 39,694; Hyderabad-WH4 39,250; Bengaluru-WH3 38,771; Mumbai-WH1 32,403	Chennai-WH5 has the highest stock among the displayed warehouses; Mumbai-WH1 the lowest.

4. Customer & Payment Insights

- The Regular customer segment is the largest displayed segment at 4.0K, followed by Budget at 2.5K.
- UPI is the largest displayed payment method at 17.57K (35.14%), followed by Credit Card at 10.01K (20.01%).
- Premium, New and Inactive segments are also visible in the dashboard for customer-mix monitoring.

Payment method	Volume	Share
UPI	17.57K	35.14%
Credit Card	10.01K	20.01%
Cash on Delivery	7.62K	15.25%
Debit Card	5.88K	11.77%
Net Banking	4.03K	8.05%
EMI	2.94K	5.89%
Wallet	1.94K	3.89%

5. Operations Analysis

The Operations page combines an order-status funnel, payment-method breakdown, return-reason analysis, a date-range slicer, and management key insights.

- Customer mix is led by the Regular segment (4.0K), followed by Budget (2.5K). Premium and New customers are both shown at 1.5K, while Inactive customers are 0.5K.
- The Operations page shows 32.50K delivered orders, with 6.00K cancelled, 5.07K shipped, 3.93K returned and 2.50K processing.
- UPI is the largest displayed payment method at 17.57K (35.14%), followed by Credit Card at 10.01K (20.01%).
- Return reasons are relatively close in volume, with Size Issue the highest displayed reason (1,196) and Quality Issue the lowest among the listed reasons (1,075).

6. Return Reason Analysis

Return reason	Count of returns
Size Issue	1,196
Changed Mind	1,150
Damaged in Transit	1,143
Wrong Product Delivered	1,135
Defective Product	1,134
Not as Described	1,125
Duplicate Order	1,081
Quality Issue	1,075

7. Inventory Analysis

- Stock Status Summary: 236,452 In Stock, 1,317 Low Stock and 0 Out of Stock.
- The Low Stock Products table provides product ID, quantity available, reorder level and status.
- Warehouse Stock Distribution shows Chennai-WH5 at 47,400 units and Mumbai-WH1 at 32,403 units among the displayed warehouses.
- A Warehouse Location slicer is available for focused analysis.

8. Management Action Points

Inventory monitoring: Use the warehouse slicer and low-stock product list to review products with available quantity below reorder level and prioritize replenishment where required.

Order operations: Track cancelled and returned orders alongside delivered orders to identify operational or customer-experience issues that may require investigation.

Payments: Maintain visibility on the major payment methods, especially UPI and card payments, and monitor payment performance separately when payment-failure data is available.

Returns: Review the leading return reasons—particularly Size Issue, Changed Mind and Damaged in Transit—to identify opportunities for product information, packaging or fulfillment improvements.

Customer engagement: Use the customer-segment view to distinguish Regular, Budget, Premium, New and Inactive customers for targeted engagement and retention activities.

9. Data & Interpretation Notes

- The report reflects the values and labels visible in the Power BI dashboard screenshots and the Phase 4 dashboard requirements shared in the project materials.
- Values are presented in the same displayed units (K/M where applicable). No additional calculations or external data have been introduced.
- The dashboard contains five pages: Revenue Overview, Category Performance, Customer Insights, Operations, and Inventory Analysis.
